<https://github.com/R4D4M4NTHYS24>

camilorg2017@gmail.com

I am a Front-End developer and UX/UI designer with 2 years of experience. I have worked on various projects ranging from designing and developing custom websites to maintaining and updating existing sites. My skillset includes modern front-end technologies such as React, Angular, Vue, HTML, CSS, JavaScript, and Python, design skills with Figma, as well as working with Lean and Design Thinking agile methodologies. My curiosity about artificial intelligence has led me to explore Machine Learning and Natural Language Processing in my free time, allowing me to understand how these technologies can be applied in my field. You can find me on LinkedIn as:

Experience

2023 - Present

Crwn Clothing React Store

Massive e-commerce application similar to Shopify using React, Redux, React Hooks, React Suspense, Context API, React Router, TypeScript, PWA, Styled-Components and Firebase.

<https://crwn-clothing-react-cr.netlify.app>

2022 - 2023

Fitness Tracker

Fitness activity tracker developed using Angular 15, utilizing Angular Material 15, Angular Fire 7.5, and NgRx 15 libraries. (Try it using the following credentials: test@test.com, 1234567).

<https://ng-fitness-tracker-efef9.web.app>

2020 - 2022

Marvel-Initiative

This web app was built by creating high-fidelity prototypes with Figma. It uses the official Marvel API through modern JavaScript.

<https://marvel-initiative-5bf01.web.app>

2020

Omnifood

Website built with semantic HTML5, modern CSS3, flexbox, and CSS Grid.
